

ABHISHEK VISHWAKARMA

React Native Developer | Full Stack Developer (Next.js / Node.js)

India | YOUR_EMAIL@example.com | +91-XXXXXXXXXX | LinkedIn: YOUR_LINKEDIN | GitHub: YOUR_GITHUB

PROFESSIONAL SUMMARY

React Native and Full Stack Developer with around 5 years of overall software experience, including production mobile development, web development, backend APIs and SQL support. Strong in React Native, TypeScript, Next.js, Node.js, Redux Toolkit, RTK Query and Microsoft SQL Server. Experienced in logistics and transportation products spanning vendor, driver, customer and runner workflows, with hands-on work in KYC, vehicle management, load management, maps, live tracking, OTP and payment flows.

CORE SKILLS

Mobile	React Native, TypeScript, React Navigation, RN CLI, react-native-maps, Mapbox, Vision Camera
Web	Next.js, React.js, JavaScript, HTML5, CSS3, jQuery, responsive UI
State & Forms	Redux Toolkit, RTK Query, Formik, Yup, reusable components, API state management
Backend	Node.js, REST APIs, Socket.IO, authentication flows, third-party API integration
Database	Microsoft SQL Server, MSSQL, SQL queries, stored procedures, data-driven API workflows
Tools	Git, npm, Android, debugging, Metro/Gradle troubleshooting, production issue analysis

PROFESSIONAL EXPERIENCE

React Native Developer / Full Stack Developer | **MotoHelp Pvt Ltd** | *Current role*

- Develop and maintain logistics and transportation applications across vendor, driver, customer and independent-runner workflows.
- Build production mobile experiences with React Native and TypeScript using Redux Toolkit, RTK Query, reusable components, forms and navigation.
- Implement onboarding and KYC workflows with third-party verification integrations including Aadhaar, PAN, GST and vehicle/RC verification.
- Work on vehicle management, load management, operational dashboards, trip flows, OTP, payment/receipt flows and driver status experiences.
- Implement map-based experiences with Mapbox / react-native-maps and live location updates using Socket.IO and location services.
- Collaborate across Node.js APIs and SQL Server stored procedures for data retrieval, business workflows and production debugging.

Web Developer / Support Engineer / SQL Support | **Neotech IT Services** | *Previous experience*

- Worked across web development, technical support and SQL support responsibilities for application workflows.
- Built and maintained web functionality with HTML, CSS, JavaScript, jQuery and React-oriented front-end practices.
- Debugged production issues involving application logic, database queries and SQL Server data flows.

SELECTED PROJECTS

MotoHelp Vendor Application

Vendor onboarding, KYC, vehicle management, load management and dashboard workflows. *Stack: React Native, TypeScript, Redux Toolkit, RTK Query, Formik/Yup, Node.js, MSSQL*

MotoHelp Driver Application

Driver trips, live location, mapping, OTP and operational status flows. *Stack: React Native, TypeScript, Mapbox, Socket.IO, Redux, REST APIs*

Customer & Runner Applications

Load creation, nearby opportunities, operational coordination and status management. *Stack: React Native, TypeScript, maps, RTK Query, APIs*

Tracker X Mobile App

Location-focused mobile experience supporting map-based tracking and operational visibility. *Stack: React Native, TypeScript, map APIs*

Full Stack Web Applications

Reusable web interfaces, APIs and SQL-backed application workflows. *Stack: Next.js, React.js, Node.js, MSSQL*

EDUCATION & ADDITIONAL

- Education: Add your degree / diploma / university details here.
- Availability: Open to React Native, Full Stack and product engineering opportunities.
- Portfolio: Next.js portfolio included with this resume package.
